

MUIBI RASAQ

Full Stack Developer | Industrial Automation Engineer

rasaq608@gmail.com · +966 51 149 5148 (WhatsApp) · github.com/Rosisky527 · linkedin.com/in/muib-rasaq-a97901255
Jeddah, Saudi Arabia · Available: Freelance / Remote

Full-stack development, built with an automation engineer's discipline.

I write JavaScript and Python by day, and I've spent 5+ years keeping conveyor and sortation control systems alive by trade. That background shapes how I build software: methodical, tested, and documented, with an engineer's respect for what happens when something breaks in production.

PROJECTS

Rosco — Crypto Paper Trading Simulator — Shipped · PWA

Full progressive web app for practicing crypto trading with zero real risk. Live prices via the CoinGecko API, TradingView Lightweight Charts with live-ticking candles and OHLCV hover tooltips across eight timeframes, \$10,000 virtual balance, session-based auth. Installable as a PWA with full icon set and service worker.

[JavaScript](#) · [CoinGecko API](#) · [TradingView Charts](#) · [Service Worker](#) · [PWA Manifest](#)

Dungeon Quest — RPG Game — Shipped · Live: rosisky527.github.io/fact_project/

Browser-based RPG built around ES6 classes and factory functions — character stats, combat logic, and game state managed entirely in vanilla JavaScript, deployed as a static site.

[JavaScript \(ES6\)](#) · [OOP / Factory Functions](#) · [GitHub Pages](#)

Pokemon Finder — Shipped

Lookup tool built on the public PokeAPI, using async/await to handle live data fetching and rendering without blocking the UI.

[JavaScript](#) · [PokeAPI](#) · [Async/Await](#)

Object Detection Model — Self-directed

YOLO-based object detection model trained and evaluated with PyTorch, built as a self-directed deep dive into computer vision fundamentals.

[Python](#) · [PyTorch](#) · [YOLO](#)

Algorithmic Trading Prototype — Self-directed

Python prototype exploring rules-based algorithmic trading strategies — signal logic, backtesting mechanics, and position sizing.

[Python](#) · [Backtesting](#)

SKILLS

Languages

JavaScript, Python, HTML5, CSS3

Web / App

Progressive Web Apps, REST API Integration, Responsive Design, Git/GitHub

Industrial Control

Siemens TIA Portal, S7-1500F/S7-1200 PLCs, PROFINET/ASi-Bus, PLCSIM

EXPERIENCE

MHE Technician & Industrial Automation Engineer 5+ years

Vanderlande cross-belt sorter systems — PLC programming and troubleshooting, fieldbus networks, zone controllers, and motorized roller diagnostics across live warehouse operations in Saudi Arabia and Nigeria.

Freelance Web Developer Ongoing

Independent web and PWA projects, client consulting on live site issues, and self-directed builds spanning finance, gaming, and data tools.

Expert Contributor — AI Content Evaluation Ongoing

Reviewing and verifying SWE-bench style coding task submissions for Snorkel AI — auditing repos, applying patches, running test suites, and writing structured technical verdicts.

Education

Electrical/Electronic Engineering background. ALX Africa Software Engineering Certificate.
